TO WHOM IT MAY CONCERN

Reference for Knot Only Carpentry: Commercial Non-Structural Fitout Registration

I have known Paul Naylor, the principal of Knot Only Carpentry, since 2000. From 2000 to 2006, Paul Naylor worked for a builder on three projects where I was the architect, acting as the builder's representative on site for projects from \$100,000 to \$1,500,000. Since 2006 he has been registered as a domestic builder and has undertaken three projects where I was the architect.

Mr Naylor is a highly competent builder. He coordinates other trades, plans the program of work and directs staff in an efficient and effective manner. The quality of his work is particularly high. He has the necessary technical understanding for compliance with relevant Regulations and Codes, pays attention to occupational health and safety issues and works within the agreed times.

I have no hesitation in recommending Mr Naylor's technical and practical competence.

My office undertakes a variety of commercial projects. I believe that Mr Naylor would meet the requirements for successfully delivering these projects to the client.

Yours sincerely

Meredith Gould
